Wound Care Instructions

- Remove bandaid in 24 hours.
- Wash area daily with gentle soap and water using fingertips only.
- Apply Vaseline or Aquaphor twice a day.
- It is not necessary to keep area covered, but a Band-Aid may be more comfortable in some cases.
- Apply firm pressure for 30 minutes if area begins to bleed.

Biopsy Results

- We will call in about 2 weeks with your biopsy report.
- If you have given us permission to leave a voicemail, we may leave the results or a request that you contact the office to discuss results and/or treatment. If you do not give us permission for voicemail, we will leave a message requesting you call our office.
- If you do not have voicemail and have not spoken with someone from our office after 2 weeks, please call to discuss results.
